

Fabric Poster Instructions

When you first get your poster:

Your poster has been delivered to you with a paper backing. Before folding and packing the poster in your luggage you will want to remove this backing.

To remove the paper backing from your poster choose a corner and carefully separate the paper from the fabric. Slowly work the paper away from the paper backing.

Once the fabric poster is separate, the paper backing can be disposed of and you can pack your poster for travel.

Ironing Instructions:

Upon arriving at your final destination your poster can be unpacked and ironed to remove the majority of wrinkles and creases.

To iron your fabric poster set your iron to a low steam / synthetic setting.

Carefully and evenly iron the back, non-printed side of your poster until the desired amount of wrinkles and creases has been removed.
